(54) LUBRICATING MEDICAL IMPLEMENT AND ITS MANUFACTURING METHOD

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a medical implement whose surface lubricating substances or the like (belonging to a kind of lubricating materials) are free from such problems as elimination, separation and/or elution from the surface material and whose lubricating effects last for a long period of time.

SOLUTION: This lubricating medical implement is composed of a substrate, a vapor deposition polymerization film formed on the substrate and a hydrophilic polymer film fixed on the vapor deposition polymerization film.

LEGAL STATUS

[Date of request for examination]

04.07.2003

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
